

MYTILINEOS finalized the provision of equipment to the Pediatric Clinic Emergency Room of Ioannina General University Hospital

Global Sustainable Development Goals supported by the initiative

Corporate Social Responsibility and Sustainable Development Initiatives

Athens, Greece – 25 February 2019 – MYTILINEOS continues the important cooperation, launched in 2017, with the non-profit organization "**Pediatric Trauma Care**" supporting its mission to create and upgrade the Emergency Departments in the country's Health Centers and Pediatric Hospitals and to raise awareness, especially among parents and teachers, on children's accidents in Greece.

In the context of this cooperation, MYTILINEOS recently provided the medical equipment required to make fully operational **the Pediatric Clinic Emergency Room of Ioannina General University Hospital**. Upon completion of this project, the University Hospital shall be able to respond, right from the first critical hour, to any child injury, gaining thus precious time for the child's health outcome.

It is expected that the **Emergency Room** will offer immediate help to more than **5.700 children** annually, while approximately **2.500 children** are screened either as chronic cases or in the **University Pediatric Clinic's** special medical care facilities.

This project becomes increasingly important given that Ioannina University Pediatric Clinic covers the regions of Epirus, Corfu, Lefkada, Aitolokarnania, Western Macedonia and Southern Albania. With the influx of thousands of refugees to Epirus, the clinic offers hospital and primary care to hundreds of refugee children.

In addition, the company continues to contribute to the Organization prevention programs, covering printing and free distribution expenses of information material to teachers and parents because prevention still remains the most effective pediatric trauma treatment.

MYTILINEOS as part of its contribution to Sustainable Development Goal "Good Health & Well Being", has also created from the very start the **Emergency Department of Livadia General Hospital**, has equipped the **Pediatric Medical Facility of Hydra Health Center** with all necessary machinery and has contributed

significantly to the setting up of **Larissa General Hospital Emergency Department**. It is estimated that such health care infrastructure serves more than **16.000 children annually**.
